

Trim-A-Brake II

Unique toggle locking system means you'll never have to beat this handle!

The Trim-A-Brake II™ by Van Mark is a portable bending brake with durability and versatility second to none. Ideal for custom forming aluminum, galvanized steel, copper, terne and other metals - coil or sheet. The Trim-A-Brake II™ bends .032 aluminum and 28 gage galvanized steel with ease. The Trim-A-Brake II™ features a toggle locking system with single point adjustment for worry free, low-maintenance operation. Contact your Van Mark distributor today and see how economical Van Mark quality can be.
