

Installation of End Caps:

Tools that will be needed for attaching an end cap to a gutter:

- End Cap Crimper

- 12-1 Sealant

- Caulking Gun

Steps in installing end caps to gutters:

1. Insert back part of end cap over back part of gutter.

2. Work bottom of end cap over bottom of gutter.

3. Do the first two steps for attached the face of the end cap to the gutter.

4. You will make 2 crimps on each of the face, back, and bottom of gutter.

5. Next you will need to caulk the inside of the gutter that is attached to the end cap.

6. After the last step is done, you have completed the installment process of attaching an end cap to a gutter.
