

MICRO MESH

GUTTER PROTECTION SYSTEM

Heavy duty offset louver system, combined with marine grade stainless steel, prevents the tiniest particles from entering the gutter.

- Corrosion-resistant 316 stainless steel micro-mesh
- Effective against small debris, including pine needles and seed pods
- Offset Louver System handles the heaviest of rains and is engineered to draw rainwater in, while preventing debris from entering
- Industrial grade paint system preserves the finish
- Works with screen enclosures
- Works with 5" & 6" K Style Gutters
- Proudly made in the U.S.A.; tested to meet the highest quality of standards
- Available in White or Brown
